SAS® Programming - Basics

The EG, DI an Info Map Expression Builder for IF/Then logic, functions and formats

The 'Expression Builder' utility is the standard 'non coding' method of creating new fields and filters in SAS DI Studio, SAS Enterprise Guide and SAS Information Map Studio.

Mastery of this utility opens up a world of capability only known to SAS Programmers. But without needing to spend days learning the SAS programming.

Through this utility and an understanding of commonly used SAS Functions, Formats and conditional statements, you can vastly expand the capability of your SAS DI Studio jobs, SAS Enterprise Guide projects and SAS Information Maps.

Total approximate delivery time based on selected topics: 1.00 Days.
This estimate includes breaks and is based on a 7hr training day
